

Connected2Fiber

BUILDING LIST MANAGER

Connected2Fiber's Building List Manager moves network operators out of Excel and email, and allows them to program the automatic distribution of their coverage data to wholesale, channel and large enterprise clients. The efficiency provided by Building List Manager drives revenue by ensuring that all of your locations are up-to-date in your partners databases, enabling them to increase their network reach and connectivity to their customers.

LATEST & GREATEST

Lists are built on dynamic configuration of building category, geography and/or connected status to ensure your data is current.

SYSTEMATIC QUALITY CONTROL

Automate fiber information sharing to ensure the correct format, list configuration and frequency required by each provider, is followed.

SILENT SALES FORCE

Maximize your partnerships and revenue by providing prospects and customers access to The Connected World to view your routes, buildings and product availability.

IN-SYNC PARTNERSHIPS

Open availability API for clients to access building coverage and product availability, as well as key information.

Call or visit our website, and schedule a custom demo to see how our Building List Manager Module can help your business. Your fiber connected locations are only as valuable as you make them.
