

## PROFESSIONAL SERVICES

With Connected2Fiber's Professional Services, you get access to more than consultants, you get hands-on support from experienced GIS analysts, telecom veterans, and software developers. In addition, you are able to engage with network leaders who are highly skilled in implementing innovative systems and applications that result in increased revenue and serviceability.

### **NEARNET ANALYSIS**

This analysis ranks and identifies locations within proximity of a network operator's existing on-net footprint.

### **DIVERSITY STUDIES**

Comparison of alternative, diverse carrier paths, and building entry points assuring resiliency in the event of a single network failure.

### **MARKET SHARE REPORTS**

Analytical studies of industry trends, products, services, allowing you to stay ahead of your competition.

### **RECORD CONVERSIONS**

Integration, cleansing and transference of data from multiple sources to reduce complexity and provide meaningful data to drive business opportunities and long term strategies.

### **LINE OF SIGHT ANALYSIS**

Determines reachability of buildings based on location of customer assets.
